Congratulations on your acceptance to UTHSCSA Dental School. Your educational process here will include the use of a laptop computer to support your educational and clinical activities. Each year the Dental School conducts surveys of entering students related to their computer technology experience and skills. Your responses to this survey will assist the Dental School in its efforts to enhance the informatics curriculum and support for your class. The goal of this project is to: 1. assess student use of information technology (e.g., computer hardware and software) and aid in planning the informatics portion of your curriculum, 2. assess the development of students’ computer and information management skills, and 3. measure student attitudes toward information technology.

The surveys can be accessed through the Internet at: http://ice.uthscsa.edu/techsurvey/.

Click on the links and answer questions as indicated (there are several questions with drop down menus - see example below).

Please complete these surveys by May 18, 2012. If you have any problems contact Dr. Gary Guest (guestg@uthscsa.edu or 210-567-3265), Assistant Dean for Predoctoral Clinics. Thank you for your participation in this important activity.
