The Department of Surgery invites all interested parties to an informal discussion on “Tissue Engineering”

This gathering will focus on the future of tissue engineering research in the San Antonio research community. Tissue engineering research has great potential for improving patient therapies after plastic surgery or damage from trauma, burn, or cancer.

Monday, January 29, 2006
UTHSCSA Auditorium Foyer
5:00-6:30 PM

An assortment of seasonal wines and cheeses will be served

Quarterly gatherings have been developed by the Department of Surgery to initiate and enhance collaborative basic, translational and clinical research endeavors.

For information and to RSVP, please contact Susan Robinson at robinsons@uthscsa.edu or 567-5851
