**Subject:** New RFAs on the Service Life of Dental Resin Composites

The Dental Materials and Biomaterials Program at NIDCR would like to announce two RFA's on Increasing the Service life of Dental Resin Composites. This research is intended to be multidisciplinary involving materials scientists, microbiologists, cariolgists, and clinicians together with investigators from new disciplines to understand the factors involved in secondary decay for dental resin composites.

- Increasing the Service Life of Dental Resin Composites (R01)
