Priority: High

Dear Dental Research Students,

Welcome to the **2013 Dental Student Summer Research Program!** We hope that you will have an excellent experience.

The summer is approaching and I wanted to remind you all about a few things. First of all, thank you to all for your interest in the program. Second, it is important that you have been working closely with your mentor in order to develop the proposal before the summer starts. In that way, you optimize your time during the summer to work on executing the research project. Six-weeks goes by really fast. Please keep open communication with your mentor at all times. But, feel free to email me if you have any questions.

Remember that you **do not** have to enroll for any selective courses on-line for the summer. Your name will be forwarded to the Dean's office and the Research Program will count as your summer selective.

The program starts on May 20th and goes on through June 28th. However, you should discuss with your mentor your work schedule to see if any extra days are needed for the project. Please find a tentative schedule attached to the email for the **Seminar Series** that are mandatory attendance. More info will be sent out later.

Please feel free to email me if you have any questions about the program
Thank you !

Erica Teixeira
Director Dental Student Research Program
