CC: Kadosh, David, Li, Senlin, Chen, Xiao-Dong, Harris, Stephen E, Mooberry, Susan L, Hornsby, Peter J, Hinojosa, Noemi O

Priority: High

Message forwarded from Dr. Bjorn Steffensen

Dear DDS/PhD students

As we discussed last year, unless your mentor finds major obstacles, I would like to see all of you present your research each year at the Mikiten graduate student research forum including the upcoming forum.

This is important for several reason, among which I wish to emphasize just two:

- Our DDS/PhD program is designed specifically to encourage and give our students the opportunity for interactions and networking with other graduate students and thereby benefit from the educational and scientific enrichment that originate from this type of events.

- It is essential for the DDS/PhD program to successfully demonstrate that its students participate actively and fully in graduate school activities and have excellent research projects in order to maintain the strong support and goodwill that we enjoy currently from the graduate school and departments.

Please note that you can use presentations that you have prepared for other meetings, including the ones you presented at the recent Dental Science Symposium

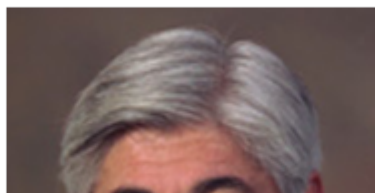

Enjoy the event.

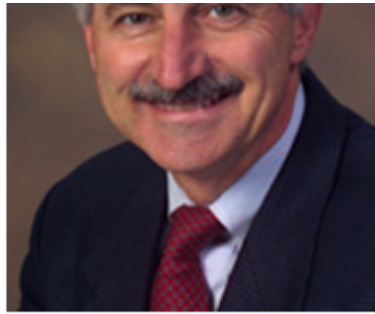

Bjorn Steffensen

The following message is sent on behalf of the GSA Officers:

****** *Deadline has been extended!* Abstracts should be submitted electronically to Calais Williams (williamscs@livemail.uthscsa.edu) by **Friday, April 26, 2013** ******

TERRY M. MIKITEN, PH.D.
GRADUATE STUDENT RESEARCH FORUM
AND DISTINGUISHED LECTURE

FRANK PORRECA, Ph.D.
University of Arizona
Friday, May 3, 2013 9AM-3PM
Greehey Children's Cancer Research Institute
