CLINICAL ASSAY DEVELOPMENT PROGRAM

DCTD
Division of Cancer
Treatment and Diagnosis

Call for Applications

The NCI [Clinical Assay Development Program](#) (CADP) is accepting [applications](#) from investigators seeking clinical assay development and validation resources.

These resources are designed to assist with the development of assays that may predict therapy response or prognostic behavior of a diagnosed cancer, primarily for use in clinical trials. In addition to access to the Institute's assay and validation resources, approved projects will receive project management support.

When applying to the CADP:

- Define the intended clinical use for the assay for which support is requested
- Provide basic assay protocol(s)
- Demonstrate the assay's performance in human tissue

Application deadline is October 15, 2013

To learn more about CADP, or to submit an application, please visit <http://cadp.cancer.gov> or email CADP at NCI_CADPinfo@mail.nih.gov

Please note that this call for applications is not a solicitation for biomarker discovery and is not a grants program. Proposals will be reviewed for scientific merit, feasibility, and clinical importance.
